## 1. Find the number of stores in each country.

|    | country character varying (25) | number_of_stores<br>bigint | â |
|----|--------------------------------|----------------------------|---|
| 1  | Argentina                      |                            | 1 |
| 2  | Australia                      |                            | 3 |
| 3  | Bolivia                        |                            | 1 |
| 4  | Brazil                         |                            | 2 |
| 5  | Canada                         |                            | 8 |
| 6  | Chile                          |                            | 1 |
| 7  | China                          |                            | 4 |
| 8  | Costa Rica                     |                            | 1 |
| 9  | Dominican Republic             |                            | 1 |
| 10 | France                         |                            | 2 |
| 11 | Germany                        |                            | 2 |
| 12 | India                          |                            | 2 |
| 13 | Indonesia                      |                            | 1 |
| 14 | Italy                          |                            | 1 |

#### 2. Calculate the total number of units sold by each store.

| sold 🔓 |
|--------|
| 47498  |
| 44891  |
| 44784  |
| 44395  |
| 44367  |
| 29882  |
| 29595  |
| 29536  |
| 29504  |
| 29451  |
| 29357  |
| 29297  |
| 29215  |
| 29196  |
|        |

3. Identify how many sales occurred in December 2023.

4. Determine how many stores have never had a warranty claim filed.

5. Calculate the percentage of warranty claims marked as "Warranty Void".

|   | warranty_void_claims<br>numeric |  |
|---|---------------------------------|--|
| 1 | 23.16                           |  |

6. Identify which store had the highest total units sold in the last year.

|    | store_id character varying (10) | character varying (30) | total_units_sold bigint |
|----|---------------------------------|------------------------|-------------------------|
| 1  | ST-36                           | Apple Sydney           | 290                     |
| 2  | ST-54                           | Apple Ankara           | 287                     |
| 3  | ST-53                           | Apple New Delhi        | 282                     |
| 4  | ST-48                           | Apple Shanghai         | 282                     |
| 5  | ST-65                           | Apple La Paz           | 276                     |
| 6  | ST-70                           | Apple Newcastle        | 276                     |
| 7  | ST-51                           | Apple Seoul            | 272                     |
| 8  | ST-45                           | Apple Bangkok          | 272                     |
| 9  | ST-50                           | Apple Taipei           | 272                     |
| 10 | ST-57                           | Apple Riyadh           | 271                     |
| 11 | ST-41                           | Apple Mexico City      | 269                     |
| 12 | ST-61                           | Apple Caracas          | 269                     |
| 13 | ST-34                           | Apple Madrid           | 267                     |
| 14 | ST-58                           | Apple Manila           | 266                     |

7. Count the number of unique products sold in the last year.

|   | no_of_unique_products_sold_last_year bigint |
|---|---|
| 1 | 50  |

## 8. Find the average price of products in each category.

|    | category_id<br>[PK] character varying (10) | category_name<br>character varying (20) | average_product_price numeric |
|----|--|---|-------------------------------|
| 1  | CAT-3                                      | Tablet                                  | 656.50                        |
| 2  | CAT-6                                      | Streaming Device                        | 179.00                        |
